

THE CHINOOK ADVANCE

Vol. 17 Chinook, Alberta, Thursday, Aug. 18, 1932 No. 18

A Time for Careful Thought

Unless he formulates and follows a new economics it is only a question of time until the farmer as a self-respecting freeman will take his place in the museum of vanished types. In this new economics the principles of co-operative action will play a decisive role.

If the farmer is to cease being the beaten and buffeted victim of modern industrial civilization, if he is to become the master of his own economic and cultural destiny, he must organize as the rest of economic Canada has organized. If he does not he will be lost in the shuffle.

The Alberta Pool Elevators represent the foremost step in the co-operative efforts of Alberta farmers. Every Alberta grain grower should see that this Alberta co-operative organization is assured the greatest possible measure of success.

Four roomed house with garage and large garden lot. Possession can be given Sept. 1. Inquire Miss M. Otto.

Miss Marjorie Lee and Miss Norma Hurley motored to Hanna on Wednesday, where Marjorie will write off some of her grade 21 subjects.

May Eliza Foster

On Monday, August 15, the residents of Innisfail were given a severe shock when it was learned that Mrs. Leo Foster had passed away at the hospital.

Mrs. Foster has been sick for some little time and in spite of all that medical skill could do, was not able to make any gain. Her end at the last came as a real shock.

Mrs. Foster was the daughter of Mr. and Mrs. John Freeman Etheridge of Cape Breton, N.S. She came west some years ago and taught school. She was married December 27, 1922, at Calgary to Mr. Leo Foster. Mr. and Mrs. Foster resided at Chinook for some years and in May 1927 came to Innisfail. Since coming to Innisfail Mrs. Foster has won a place in the hearts of a wide circle of friends. She was an ardent member of the United Church and active in the Ladies' Aid. She took a keen interest in sport and up to last season was an enthusiastic member of the Innisfail ladies' golf club.

The funeral was held on Wednesday at 2 o'clock from St. Andrew's church, the services being conducted by Rev. Stainton, pastor of the United church.

She leaves to mourn her loss her husband, Mr. Leo Foster, to whom goes out the sincerest sympathy of the whole community. The Innisfail Province.

Cereal Farmer Seriously Injured

H. E. Duffield, a farmer living southeast of Cereal, met with a serious accident Wednesday afternoon last while raking hay. The horses became frightened at something and began to run in a wide circle. Mr. Duffield, an elderly man, held on, but was finally thrown under the rake and dragged for a considerable distance, dislocating his knee, skinning his back and side and, cutting his head and hands. He will be unable to work for the balance of the harvest.

Youngstown Elevators Make Changes in Buyers

On account of the crop estimation being lowered at Youngstown during the month of July, the elevator companies have again found it necessary to make a change in their local buyers.

E. F. Knudston, of Fife Lake, Sask., who has just recently opened the Pioneer Grain Company's elevator, has been transferred to Delia, his place being filled by S. Ryan, a local man.

J. R. Featherstone has now opened the Pool elevator at Scotfield siding, his place at Dobson siding being filled by Mr. Hall from Killam, Calgary Herald.

Miss H. Lensgraf who has been visiting with friends at Lanfne, returned Tuesday.

Billy Youell is spending a few weeks' of his holidays here with his father, A. V. Youell.

Mr P. E. Berry, of Oilmont, Montana, arrived here by motor on Monday to visit his brother L. Berry and his parents, Mr and Mrs H. Berry.

Mrs. Dawson Farwelled by Chinook Ladies' Aid

A farewell party was held at the home of Mrs. W. A. Hurley Monday evening in honor of Mrs. L. S. Dawson who leaves Chinook shortly for Wildwood, Alta.

The evening was spent in playing games. Mrs. Dawson was presented with an embroidered table cloth and napkins to match by the Ladies' Aid and a few town ladies. At the close a dainty lunch was served.

Mrs. Dawson will be missed by her Chinook and district friends.

Local News

E. O. Hocart who has been buyer for the Pool Elevator at Comper, Alberta, has been transferred to Chinook where he will be in charge of the Pool Elevator in place of L. S. Dawson, who resigned.

Dr. and Mrs R. C. Thorpe also Mrs. Thorpe, of Calgary, visited over the week end at the home of Mr and Mrs E. E. Jacques. The former being brother and the later mother of Mrs. Jacques.

MR. AND MRS. DAWSON FARWELL DANCE

About 600 people paid their respects to the Dawson's Dance, it was surely a Dawson Night. Never in the history has a farewell dance been so well patronized. Capt. Peters who is the proud owner of the largest privately owned Hotel Ballroom in Western Canada, where the ceremonies took place, gave the opening speech in well chosen and complementary words and later introduced the Hon. President of the Chinook Chamber of Commerce L. Proudfoot M. L. A., as the next speaker, who spoke very highly of Mr Dawson's past and present history, which is an honor to any citizen. Later on Mr. A. V. Youell, of the Golden Vheva Orchestra struck up the tune, "For he's a jolly good fellow", at joining in. Mr. Dawson then gave his farewell speech which ended up with three wild cheers until the singing commenced "We are the boys from Chinook town" when dancing was resumed with a real happy and jolly good crowd and kept right on dancing until the morning hours.

Mrs. S. W. V. of the peton district, underwent a very serious operation on Tuesday at the Cereal hospital. Dr. O'Callaghan of Calgary, operated with Dr. Esler assisting. At times of writing regret to report that Mrs. Warren is very low.

On Friday of last week there was a very heavy rain south of town and on Sunday there was a steady rain lasting all day over the district, which delayed the harvest for a few days.

Thos. Gilbertson was engaged by the school board to do the necessary plastering at the school.

Miss Mae Todd who has been spending a holiday at Calgary and other places, returned on Friday.

Here and There

Popularity of Canadian apples abroad has notably increased, and last year apple exports to Europe from Western Canada reached a new high record of 1,174,000 boxes, as compared with 560,000 boxes in 1920. Fruit growers are anticipating an even larger crop this year.

R. Y. Danlaud, formerly Traveling Passenger Agent, Canadian Pacific Railway, Winnipeg, was appointed District Passenger Agent, Algoma District, North Bay, Ont., effective August 16th. Mr. Danlaud has had a long and successful career with the Company, and is now receiving congratulations on his most recent promotion.

Numbers of anglers returning through Ottawa and Montreal report having experienced exceedingly good bass fishing. This was the expression of a group from Cincinnati, Ohio, who recently visited the bass fishing waters of the Gatineau River, north of Maniwaki, according to A. O. Seymour, General Tourist Agent, Canadian Pacific Railway.

This is evidently the peak year with partridge, one would judge from the reports emanating from various parts of the Laurentian and Gatiniau districts of Quebec, according to A. O. Seymour, General Tourist Agent, Canadian Pacific Railway. In almost every locality partridge, as the ruffed grouse and Franklin's grouse are best known, are very plentiful. Most flocks hatched this year are nearly full grown.

For All Who Prefer Quality

"SALADA" TEA

"Fresh from the Gardens"

Help Our Youth Now.

Within recent weeks daily newspapers throughout the Dominion have printed columns, and sometimes solid pages, of names of young men and women who have graduated from universities and colleges or passed the final examinations of their Normal, technical, collegiate, high school or business college courses. The total number of these young people in Canada runs away up in the thousands every year, and last year and again this year has been no exception.

In the case of the University and college graduates they have, with a few exceptions who will go on with post-graduate work, come to the end of one phase of life. The same is true of the vast majority of those who have completed Normal, technical, collegiate, high school, and business college courses. A certain number of these will go to university, or take up some special course of further training, but generally speaking, these students have ended the days of their scholastic preparation for life.

In a word, this great army of youth, in their teens and early twenties have been studying and undergoing training, has completed this first stage in life's journey. They have been preparing for work. They are now ready to go to work, and are eager to begin, bubbling over with enthusiasm and keyed up with energy for the work ahead, and stirred with ideas and ambitions of what they expect and desire to accomplish.

And right at the outset they are met with rebuff, with crushing disappointment. In an overwhelming majority of cases there is no work for them to do, no positions open for them to fill, no opportunities knocking at the door to which they can respond. True, there is the old case where through family or other influence a position is made available, but, by and large, inability to secure work is the experience of this army of today's youth, trained, eager and ready to work. They find themselves in a world which offers them little or no opportunity to use their hard won knowledge and training.

Herein lies the greatest tragedy of present day conditions, herein is to be found the greatest menace not only to the future lives and usefulness of these young people, but to the future of our country. At the close of one period in their lives, they are confronted with a blank wall; they cannot retrace their steps, they cannot go forward. What are they to do except "mark time" for the present, and, while marking time, what is to be effected on their enthusiasms, their energy and initiative, their ambitions—in a word, on their character? They must fill in the time in some fashion. During this trying period of enforced idleness, are they going to develop habits of shiftlessness, slip into evil ways, weaken morally? Is the clear, straight thinking developed in their student days to become twisted, and the strong anchorages deeply imbedded in the wisdom and experience of the past which have been instilled in them to be uprooted?

These are questions to be answered not only by present-day youth, but by the more adult generation. The elders of today have survived other depressions, other panics and crises, and they know that the evils of today will be overcome and pass away. They have confidence that there are just as good, even better days ahead; that the future holds just as great opportunities, greater in fact, than the past, and that these opportunities will come to the youth of today as they came to them. But youth, lacking the experience, is not sure of this. It has had its golden visions of immediate activity and usefulness in the world of work dimmed, if not shattered. They are hurt and bewildered. They are not at all sure of the future, and are in a questioning state of mind. They do not know where to turn. Parents and friends are absorbed in their own difficulties, worried and apt to be impatient.

The elders of this generation require to develop an understanding of their children's problems and present outlook on life, to reveal to them a deep sympathy, and to cultivate a divine patience with them. Parents can, perhaps, do more in these days to make or break the future lives of their children than was possibly the case in other years.

And what is true of the parents is likewise true of those who are the leaders of and responsible for the life and activities of the communities in which they live. Youth must be served, and if active remunerative employment for a time cannot be provided as an outlet for their energies and enthusiasms, then other provision must be made.

Students of the problem confronting youth at present suggest two forms of activity for them in the absence of other employment. One, that in each and every community adequate means and forms of recreation be provided to engage the interest of and provide an outlet for the energies of youth.—In all departments of sport, in properly supervised dances, in the organization of orchestras, glee clubs, amateur theatricals, debating societies, in libraries containing books on inventions, explorations, science, etc.

Second, in the arousing and developing of an interest among young people in the welfare of the community in which they live. If remunerative occupation cannot be provided for the youth of the community, give them the opportunity to serve themselves through some form of recreation and to serve others and the community at large until the opportunity to realize their ambitions returns. The elders of the community can develop such programmes,—there is always a need, and probably more so now than ever before,—and by the application of the enthusiasm and energy of youth they can be carried through. It will keep them out of mischief, and give them something to think about besides their own problems. Instead of becoming narrow, selfish and bitter, such an interest will broaden their outlook and such activities will sweeten their lives. They will discover much to be thankful for; that in many ways they are not so badly off after all; hope will be revived, confidence restored, new, and possibly better conditions aroused.

Out in the cattle country according to a Western paper, it is not unusual to see a \$50 saddle on a \$15 broncho. Huh! Around here we're always running into—or being run into by—\$5 cars wearing \$15 licenses.

"Look here, waiter, I've been waiting half an hour for that steak I ordered."

"Yes, sir, I know sir. Life would be worth living if everybody was as patient as you are."

Suffered A Severe Attack Of Dysentery

Mr. P. L. D. Moulard, Vernon, B.C., writes:—"Last Summer I suffered from a severe attack of dysentery. I tried nearly everything on the market, without getting any relief, until a friend told me to use Dr. Fowler's Wild Strawberry, which I did, and I got immediate relief. Now I am making it a rule to always keep a bottle of it in my medicine chest."

"Wild Strawberry is sure relief for dysentery, colic and diarrhoea, but I always see I get the genuine 'Dr. Fowler's.'"

The Coming Motor Car

New Models Show Trend Toward Stream-Line Appearance

The automobiles of the future will look more and more like one another, we are told in an informative article by T. R. Elliott in MacLean's Magazine. This will not surprise the class observer of this year's models for a tendency in this direction is already apparent. However cars may differ in other respects—in materials, appointments or power—their appearance will conform to the stream-line. They will adopt, Mr. Elliott says, a shape very much like that of a teardrop rolling down the cheek. It is the shape of the raindrop, the bird and the fish. Man, having experimented has found that nature was right, after all. The great advantage of the teardrop shape is in the saving of power. It seems that at 50 miles an hour the teardrop uses about ten horse-power as against the 20 used by the ordinary sedan. It means a saving not only in gasoline but in engine construction. Automobiles should tend to become cheaper and more economical to operate. There are other improvements along the highway that leads to the "perfect" car. One of them is suspected to be the super-balloon tire. Others have to do with materials, lubrication and engine design. The last word in automobiles has not yet been uttered. The industry has an interesting future.

WHOLE FAMILY WITH INDIGESTION

A mother of four writes:—"Myself and family of four all seemed to suffer from acidity, pains in the back, and other forms of indigestion. I suffered whatever I ate. But since we have been taking Kruschen (for the last three months) we can eat anything and all enjoy our food much better. We never have a trace of acidity or pain now. I think it is a wonder. It has no upsetting results. Whatever we may give up without, we cannot not give up Kruschen." M.K. Kruschen Salts swiftly neutralizes acid, takes all the torment out of it, and gently expels it from the system. And by stimulating your organs of elimination to perfect regular action, Kruschen will prevent this harmful acid from ever accumulating again. After that you'll experience no more misery after meals. Kruschen will keep your inside clean and free. Pure and invigorated blood will be sent coursing to every part of your body. You'll feel young, energetic and well. As healthy and hearty as it is humanly possible to feel.

Food Prices Decline

Cost Of Food Half Of What It Was In 1921

Cost of food today over the store counter is considerably less than half what it was in 1921, and has shown a marked decline since 1929, a report issued by the Dominion Bureau of Statistics shows.

The index numbers of the Dominion Bureau of the retail prices of food 11 years ago stood at 141.1; in 1929 it was 101, slightly over the base of 100 in 1926, and in July this year it was 61.4, a drop of 39.6 points in three years.

The index number of clothing, fuel and rents has also declined, and on the whole the change in the cost of living is shown by a drop in the total index from 99.9 in 1929 to 80.8 last month.

Practically every item of food shows reductions, including meat, butter, milk, bread, sugar, coffee and tea. Vinegar is a lone stand-out, showing little change. It was 7.5 cents per pint in 1929. Today it is 7.8 cents.

Dragged Down By Asthma. The man of woman who is continually subject to asthma is unfitted for his or her life's work. Strength departs and energy is taken away until life becomes a dreary existence. And yet this is needless. Dr. J. D. Kellogg's Asthma Remedy has brought a great change to an army of sufferers. It relieves the restricted air tubes and guards against future trouble. Try it.

Using Canadian Ports

Canadian ports are being used by Canadian shippers to a greater extent than possibly ever before, and the routing of the Dominion's grain to the United Kingdom via the all-Canada route is increasing. Formerly United States ports got the bulk of Canadian grain for shipment overseas, but this situation has been changed in the past year.

"The modern girl is nothing but an animated doll," declares a novelist. He must admit, however, that she doesn't call "Mamma" when she is squeaked.

Made by Janarius Gagliano, in Naples, in 1745, a violinello was sold in London recently for \$1250.

CIGARETTE TOBACCO

Bidding For Tourist Trade

Canada Can Draw Business By Advertising Pleasure Resorts

Tourists in Canada, 1931, spent \$297,238,000. Canadian tourists abroad spent \$113,292,000. Canada's net debt to tourists was \$195,946,000. That's a debt that's all to the good in these days of so many bad ones, and Ontario and Quebec which got the major portion of it are to be congratulated on the successful harvest of their advertising. Canada's balance in tourist trade is so much greater than her balance of trade in commodities that catering to tourists looks almost like a Wallingford scheme for the rapid accumulation of wealth.

Saskatchewan is the latest province to make a bid for the trade of travellers. Previous to the opening of the Prince Albert National Park, Saskatchewan was strictly with a poverty of playgrounds, and had only the sight of the waving seas of wheat to offer as an inducement to vacationists. However, she has boomed the name of the park by catering to two motorcades from the south, one from Montana and the other from the states as far south as Colorado adjacent to U.S. highway 82. Saskatchewan is not alone in this. Governors of North Dakota, South Dakota and Wyoming, and it is slated as an annual affair to arouse and maintain interest in what is termed "the international highway of three nations," with Prince Albert National Park at one end and Mexico at the other.—Edmonton Journal.

Revenue From Radio

Receipts From Radio Licenses Exceed One Million Dollars

Receipts from radio receiving licenses this fiscal year already exceed \$1,000,000. This means 500,000 owners of sets have taken out licenses. This is said to be about half of those owning sets. It had been planned to prosecute those who did not take out licenses voluntarily but it has been decided to first make a house to house canvass. Commander C. P. Edwards will have charge of organizing this Canada-wide undertaking.

Many infants are infested by worms which cause great suffering, and if not promptly dealt with may cause constitutional weakness difficult to remedy. Miller's Worm Powder will clear the stomach and bowels of worms and will so act upon the system that there will be no recurrence of the trouble. And not only this, but they will repair the injuries to the organs that worms cause and restore them to soundness.

EAGLE BRAND

CONDENSED MILK

Canada Now Importing

Raisins From Australia

Supply Formerly Came From United States and Spain

"Have you had your iron today?" That is the question people used to shout at us some years ago, and those of us who heeded, and thought we needed iron, promptly went out and bought raisins that came from Spain or the U.S.A.

It is different today. We've begun to raise iron (not the old sort) with our iron, have started to buy our raisins from South Africa and Australia. Australia, indeed, is now sending us more raisins than we get from across the line.

Under the new trade treaty importation of Australian raisins has increased from 4,000,000 pounds in the first six months of 1931 to 4,489,309 in the same period of 1932. In the latter year of 1931 we imported 8,291,732 pounds from the United States, but the import has declined this year to 5,422,063.

The last three months demonstrate very clearly the efforts which Australia is making to capture our raisin trade. The amount imported from Australia has been 4,291,690 pounds as compared with 2,239,352 from the United States. Incidentally all of us who are preaching the need for and benefits of trade within the Empire can help along the good work by "buying British."—Ottawa Journal.

A Corrector Of Pulmonary Troubles. Many testimonials have been presented showing the great efficacy of Dr. Thomas' Electric Oil in correcting disorders of the respiratory processes, but the best testimonial is experience and the Oil is recommended to all who suffer from these disorders with the certainty that they will find relief. It will ally inflammation in the bronchial tubes.

Mystery V.C. Holder

How Commander Agar Won Coveted Decoration Was Never Revealed

Commander Agar, who is with H.M.S. Scarborough in the West Indies, and who was gravely hurt as the result of a seaplane crash that drowned two American passengers, was known as the mystery V.C., no details having been given of the act that won him the coveted bronze cross after the Great War was well over. But when the Bolsheviks placed \$5,000 on Commander Agar's head just after their cruiser "Olig" was torpedoed off Kronstadt people put two and two together. Commander Agar made his raid on the "Olig" in a small motor-boat, ran the gauntlet of Russian destroyers and heavy fortress guns, repaired damages to his craft while under fire, and made off with sails commandeered from a Russian fishing boat.

Protect the child from the ravages of worms by using Mother Graves' Worm Exterminator. It is a standard remedy, and years of use have enhanced its reputation.

Old Coin Survives Fire

Was Imbedded In Silver Of Others That Melted

A coin 1,133 years old, dated A.D. 799, has been found at Corning, Illinois, among the possessions of Jake Bittner. Mrs. Bittner's father was a coin collector, but when his home burned the coins were melted. The metal was thrown in a trunk. Dug out recently with an eye toward selling the silver metal, the mass revealed one coin imbedded in the silver. Made of copper, it had not melted.

An analyst has found iron filings in tea, chalk in custard powder, and zinc in sauce. Fired by his success, he is now bent on discovering pork in pork-and-beans.

The Amsterdam-Paris air line has installed flying telegraph offices for the use of its passengers.

Erect Higher Buildings

Permission Granted To Construct Buildings In London To Height Of 100 Feet

An upward advance in the height of buildings permitted to be constructed in London has been allowed by the County Council. Henceforth structures may rise to a height of 100 feet. The previous limit was 80 feet. Risk of fire has been the principal factor in limiting the upward extent of London's buildings, but under present methods of steel construction the risk is considerably lessened. It is doubtful, however, whether the skyscraper proportions, though heights of 200 feet are anticipated.

"I wish my wife would not live beyond our means."

"Why does she do it?"

"Just to impress the neighbors who live beyond their means just to impress us."

Bilious For Days

At Time Until She Took Vegetable Pills

Gratefully, Mrs. C. writes: "The first dose of your wonderful Carter's Little Liver Pills gave me great relief after every medicine I tried failed." Because they are PURELY VEGETABLE, a gentle, effective tonic to both liver and bowels, Dr. Carter's Little Liver Pills are without equal for correcting Constipation, Acidity, Headaches, Poor Completion and Indigestion. 25c. red box, everywhere. Ask for Carter's by NAME.

CANADIAN WOMEN FIND DUSTING DISTASTEFUL

Dust cloths going into discard; Unpleasant to use; a bother to Wash

APPLEFORD WONDER PAPER HAS GREAT VOGUE

Of all household tasks that of dusting is the least appealing to the majority of women.

However, this condition, like many another connected with housework, is undergoing a revolution. In a great many Canadian homes the women are discarding dust cloths entirely, and are using Appleford Wonder Paper instead, because it actually dusters—as it cleans—as it polishes, doing a better and much quicker job than the old dust cloth ever did.

This new, and extremely modern Wonder Paper, is made from clean rags, and is a paper pulp, treated in a scientific way with a high-grade furniture polish; and absorbs dirt instead of spreading it.

Appleford Wonder Paper comes in handy-size packages, twenty-five large sheets for twenty-five cents. You crumple a sheet into a soft pad and go over the surfaces requiring attention. Then when one side is soiled or worn, turn the Wonder Paper inside out. After you have given a quick and lasting finish to furniture and woodwork, you can still use Wonder Paper on the floors, if you wish.

And when you are through, there's no old duster to shake out or wash. Throw the soiled Wonder Paper away and you've completed the most tiresome part of housework in half the time and with half the effort.

Wonder Paper is made by the makers of the famous PARA-SANI Heavy Waxed Paper in the Green Box.

Special Offer

Most grocery, hardware and department stores have Appleford Wonder Paper in stock. If yours hasn't, we'll be pleased to supply you from the factory. Just fill in and mail this coupon.

Appleford Paper Products, Ltd., Hamilton, Ontario. Enclosed \$25c. for which please send me one full-size package of Wonder Paper and your 100 recipes for "Left-overs."

WORLD HAPPENINGS
BRIEFLY TOLD

The will of the late King C. Gillette, safety razor manufacturer, naming his widow as the sole beneficiary was probated at Los Angeles. Attorneys said the estate would be in excess of \$1,000,000.

Believed to be the last survivor of the Sixth Regiment, which took part in the riot at Cut Knife Creek and Fish Creek in 1885, Sergeant-Major Usebe Beaudoin, 66, is dead at Lachine, Que.

Two thousand five hundred dollars for an individual prize for the best sample of wheat shown at the World's Grain Exhibition next year at Regina, is the largest of its kind ever offered.

Final payment to farmers for all wheat pooled during the 1931-32 season has been made by the Alberta wheat pool, it was announced by R. D. Purdy, general manager. Total payment amounted approximately to \$200,000.

Automobiles on farms in Canada have doubled in the past 10 years and there is now a car for every 2.27 farms, figures issued by the Dominion Bureau of Statistics show. There are 726,623 farms in the Dominion and on them 321,306 automobiles.

There are 5,951,411 single persons in Canada and 3,971,193 married, it is revealed in census figures on conjugal conditions released by the Dominion Bureau of Statistics. Of the population of 10,376,786, males number 5,374,451 and females 5,002,245.

Preserving Fish By
Brine-Freezing Method

Process Used in Scotland Has Been Gratifying Success

Brine-freezing, a new method of preserving fish caught in the sea, the result of research work carried out at the Torry Research Station, Aberdeen, is regarded as a gratifying success and an exhibition of cod, sole, halibut, plaice and rock salmon frozen by this process was given recently at the Department of Scientific and Industrial Research, London.

The fish had been caught by the research vessel "City of Edinburgh" weeks previously. Some of them were fried at the department and guests enjoyed an early luncheon of fried fish at the government's expense.

This new process will, it is claimed, revolutionize the methods of preserving fish. Travellers will brine-freeze fish as they are caught, instead of, as at present, storing them in ice while the trawler is at sea. A. Lumley, superintendent of the Torry Station, said that one of the disadvantages of fish frozen under old methods had been that it was not ultimately nice to eat.

In the brine-freezing process the fish are dipped into a solution of sodium chloride (or brine) carried on board in a tank at a temperature of five degrees Fahrenheit. Then they are stored at a temperature of five degrees, and experiments have shown that fish so treated can be kept in perfect condition for three months.

The cost of installing the new plant on board is about \$8,500, but it is claimed there would be a real saving, because of the avoidance of loss on fish caught early in the voyage. A Billingsgate fish merchant says the brine-frozen fish was almost as good as freshly caught fish.

Lacked Vision

Hotel Proprietor—"Now, over there is the sea."

Copy Writer—"Where? I can't see it."

Hotel Proprietor—"You can't." My dear sir, I'm afraid you're not the man we want to write our advertisements."

Another Scotchman died as a result of a broken heart in Edinburgh last week. It seems that his doctor insisted that he give up smoking just after he had had his cigarette lighter refilled.

"What would you like, sir?"
"One lemonade—and three straws."
—Buen Humor, Madrid.

W. N. U. 1956

An Important Industry

Demand For Lobsters From Canadian Waters Is Growing

The lowly lobster has climbed to a high place of importance among Canadian industries and offers one of the brightest spots on the Dominion's business horizon, according to a bulletin just released by the Department of Immigration and Colonization of the Canadian Pacific Railway. "Both in the United States and Great Britain, demand for lobsters from Canadian waters has been growing and the industry is in a healthy state," the bulletin stated. "Lobsters now are second only to salmon as the most important fishing enterprise in Canada, the salmon industry being centered largely in British Columbia and the lobsters coming chiefly from the Atlantic coast near Halifax, N.S."

The bulletin told of a new record for a single shipment of canned lobsters which recently was made to Great Britain. The shipment contained 10,000 cases and was valued at \$200,000.

Novel Use For 'Planes

Japanese Army Machines Search For Active Volcano

Japanese army 'planes were put to the novel use of scouting for an active volcano. Reports came to Harbin that an extinct volcano in the Hinggan range to the west had suddenly become active. Rumblings were reported as heard in a place 25 miles away from Harbin. The 'planes failed to locate any evidence of eruption. Russian scientists reported 13 volcanoes in the Hinggan range back in the 18th century.

Eliminating Noise

Milk Concern In New York Is Doing Its Bit

A large milk concern serving New York City has actively entered upon a noise abatement campaign. By equipping its horses with rubber cushions for their shoes, and providing its drivers' milk bottle baskets with rubber shock-absorbers, it plans to lessen the din of early morning milk deliveries.

A necropolis is a burial ground, usually of great size, or one found near the site of an ancient city.

A Big Cargo

Lake Vessel Carries Enough Wheat To Bake 12,500,000 Loaves

An old salt sat on the bank of the new Welland Canal. Beside him sat the statistician. Talk veered uncertainly from one subject to another. Then it reached record cargoes. "And the statistician got busy."

When the "Lemoyne" opened the canal, she carried the world's greatest cargo of grain, he said. "She has already carried 571,885 bushels of wheat at one load, and that cargo would make 12,500,000 two-pound loaves of bread. If you laid those loaves end to end they would reach 2,350 miles from the distance from the spot where the wheat was produced to the sea. It would take 210 farms of 10 acres to grow the cargo and 286,000-ton railroad cars, or a train $2\frac{1}{2}$ miles long to carry it."

"Well," said the old salt, tapping his pipe reflectively against the snubbing post, "that's quite a load. I remember when the first steamboat—'Theerin'—pulled out of Port Arthur with her record cargo. It was 30,000 bushels."

Britain Perfects Super-Tanks

Much Stronger and More Efficient Than Old Type

Great Britain was the first nation to use "tanks" in warfare. Since then these instruments of destruction have been greatly improved so that England leads the world in such weapons. The latest tanks are covered with armour-plate much stronger than before and capable of resisting even the most German super-bullet, which blasts its way through the armour of the old-type tanks. They have also perfected a more mobile light tank capable of negotiating ditches, streams, trenches and other gaps much wider than its predecessors could have negotiated.

What It Stood For

A tiny butcher shop recently opened in a Connecticut town; wedged into a small store room, bears the impressive firm name of Williams & Gilchrist, Ltd. Asked what the Ltd. stood for, "Stand for limited," Mr. Gilchrist said. "You see, we're limited to meats and nothing but meats."

"What is a paradox, Mister?"
"Two wharfs side by side, sir."

Utilize White Whales

Hides May Be Used For Manufacture Of Fancy Leather Goods

The two white whales brought to Winnipeg from Hudson Bay by the Industrial Development Board of Manitoba have been rendered at the St. Boniface abattoirs and they provided 35 per cent. of their total weight in excellent quality oil, bearing a slight odor, and being only slightly stronger than olive oil. The board hopes to develop a new industry on the northern water body.

The hides are now in process of tanning which will take some time, but leather workers believe it will prove suitable for the manufacture of ladies' handbags, and other fancy leather goods. Minute study of the outer skin reveals a mottled effect with alternating patches of smooth and rough skin. Blubber almost two inches thick adheres to the hide, but comes off readily.

A Token Of Gratitude

German Soldier Pays Tribute To Humanity Of American Doughboy

A little silver coin bracelet to commemorate the humanity of an unknown "doughboy" who saved the life of his enemy was recently deposited in America's war museum at West Point.

August Ullrich, late of the Kaiser's armies, sent the trinket from his death-bed and with it this note: "Before I will have to depart, I intend to fulfill the promise I gave to a soldier of the American army, who saved my life in 1918."

"I therefore lay in your hands a bracelet made out of old German coins as a sign of appreciation for a nation whose soldiers even in war treated their enemies with great consideration."

Artificial Lighting For Office Buildings

Would Provide Uniform Glow Which Is Easier On Eyes

Some authorities on illumination contend that the office buildings of the future will be built without windows and will employ artificial ventilation, also artificial lighting throughout, in an effort to secure a uniform glow which will not tire the eyes. An instrument has been invented which tests accurately the effect of various lights on the eyes.

SUNDAY SCHOOL LESSON

AUGUST 28

GIFTS FOR BUILDING THE TABERNACLE

Golden Text: "Honor Jehovah with thy substance, and with the first-fruits of all thine increase." — Proverbs 3:9.

Lesson: Exodus 35:4 to 36:7.
Devotional Reading: Psalm 84:1, 2, 3-12.

Explanations and Comments

The Call For Contributions For the Sanctuary, Exodus 35:3-20.—Moses assembled the people and addressed them, probably from a raised platform. He reminded them that it was God's desire to have a sanctuary where He might meet them and they might offer Him their worship. He called for voluntary contributions of materials and labor for the sanctuary and its equipment and for the vestments of the priests. There was one restriction; the givers of gifts must be "willing-hearted," and the laborers "wise-hearted." The people listened and quietly went back to their tents.

"You might have wondered whether they would return, since so little had been said to touch their emotions and arouse their enthusiasm. How different this seems to the methods we use today to extract money from reluctant hands!"

"An Old Subscription List," verses 21-28.—This heading is the happy title which Dr. Alexander MacLaren gives to his exposition of this chapter. "Let each man do according as he hath prospered in his heart," wrote Paul to the Corinthians; "not grudgingly or of necessity, for God loveth a cheerful giver." The men and women on this old subscription list fulfilled that injunction of Paul's. They came—a great crowd of willing givers, "every one whose heart stirred him up, and every one whom his spirit made willing," laden with gifts needed for the building of God's house and for "the holy garments," the garments consecrated for use in the sanctuary.

"The world asks, 'How much does he give?' Christ asks, 'Why does he give?'"—John R. Mott.

They were refugees. They were living in the wilderness, where there were no stores or workshops. Materials for the tabernacle must come from their private hoards. From Exodus 12:35, 36 we learn that the children of Israel on leaving Egypt asked of the Egyptians "jewels of silver and jewels of gold, and raiment; and Jehovah gave the people favor in sight of the Egyptians, so that they let them have what they asked. And they despoiled the Egyptians." These treasures now the people poured out for Jehovah's use. Every gift was a sacrifice. It could not be repaid.

There are 121 languages spoken by the 461,000,000 inhabitants of Europe.

Vast Wool Trade

Two-Thirds Of The World's Wool Produced In British Empire

Nearly one-half of the world's raw wool, a survey by the Empire Marketing Board shows, and more than two-thirds of the wool entering world trade is produced within the British Empire.

Concerning Canadian production, the survey, a portly volume of 200 pages, says that appreciable progress has been made since 1924, though the high point reached just after the war has not since been attained. The sheep population is increasing steadily, and there is no reason to doubt a slow upward trend in wool production. Quebec and Ontario together are responsible for about one-half the Canadian clip, but their share has been gradually diminishing, with that of the Western Provinces increasing. The sheep population of the world is estimated at nearly 800,000,000, of which about one-third are in the Empire.

Recipes For This Week

(By Betty Barclay)

PIN WHEEL BISCUITS

- 2 cups special cake flour, sifted.
 - 4 teaspoons baking powder.
 - $\frac{1}{2}$ teaspoon salt.
 - 4 tablespoons butter or other shortening.
 - $\frac{3}{4}$ cup milk.
 - 4 tablespoons butter, creamed.
 - $\frac{1}{4}$ cup brown sugar.
 - $\frac{1}{2}$ cup pecan meats, chopped.
- Sift flour once, measure, add baking powder and salt, and sift again. Cut in shortening. Add milk gradually until soft dough is formed. Roll $\frac{1}{4}$ inch thick on slightly floured board. Spread with creamed butter; sprinkle with brown sugar and nuts. Roll as for jelly roll and cut in 1-inch pieces. Place in greased muffin pans cut-sides up. Bake in moderate oven (375 degrees Fahrenheit) 30 minutes. Makes 12 biscuits.

ORANGE BLANO MANGE

(Serves 6-8)

- $\frac{1}{2}$ cups evaporated milk.
 - $\frac{1}{2}$ cup sugar.
 - $\frac{1}{4}$ teaspoon salt.
 - 4 tablespoons cornstarch.
 - $\frac{1}{4}$ cups orange juice.
 - 1 teaspoon grated orange rind.
- Heat milk in double boiler. Mix sugar, salt and cornstarch. Blend with part of orange juice. Add with remaining juice to hot milk. Add grated rind. Cook until smooth, stirring frequently. If orange juice curdles milk, beat with whirl type beater. Pour into individual serving dishes and chill. If desired to mold, increase cornstarch 1 tablespoon.

Settlement Plan

Saskatchewan Families Taking Advantage Of Government Scheme

Out of 507 families approved for the Saskatchewan Government land settlement scheme a total of 318 had actually gone to farms up to August 6, according to a statement issued recently.

Further classification of this number showed that 125 families had taken up residence on purchased land and 193 on homestead lands. Figures for the cities were: Regina, number approved 136, actually gone 58; Saskatoon, number approved 298, actually gone 172; Moose Jaw, number approved 73, actually gone 58.

Origin of other families included in the settlement movement were: Arcola, 1; Yorkton, 1; Estevan, 10; Custer, 1; Indian Head, 1; Edenwold, 1; Vonda, 1; Sutherland, 4; Weyburn, 8; Gravelburg, 1.

Trials Of A Newspaper

The following item appeared in The Journal, Bates County, Georgia: "We done a good business Saturday. Junked type that cost 50, put in \$50 worth of new type and collected \$1 subscription. We tried 'em on corn last week, but had little success. This week we call for peanuts on subscription. This is as far as we are going. Don't want any hickory nuts."

An unwelcome guest is one of the best things going.

"Can't you give up drinking for my sake?"
"Who said I drank for your sake?"
—All for Alla, Stockholm.

Most fittingly, the vital new link in the Great Lakes' system, Canada's \$128,000,000 new Welland Canal, was opened, officially, by sending the greatest grain-carrier afloat, S.S. Lemoyne of Canada Steamship Lines, through the eight locks to Kingston with the biggest cargo of western wheat moved

OPENED BY WORLD'S GREATEST GRAIN VESSEL

In two years, a load of grain over 150,000 bushels greater than had ever been shipped through the lower lakes in history. The Governor-General, delegates to the Imperial Conference, Rt. Hon. R. B. Bennett and members of the Cabinet all attended the opening ceremonies at Thorold.

Photos show: top left: Rt. Hon. Stanley Bruce, of Australia; Rt. Hon. Stanley Baldwin; His Excellency, Earl Bessborough, and Rt. Hon. R. B. Bennett with two members of the Indian delegation at the canal ceremonies. Left center: the giant 633-foot S.S. Lemoyne passing under one of the canal 120-foot electric lift bridges. Right center: marking the inauguration of a new eastern deep-water terminus for grain at Kingston and the fact that only 200 miles of river navigation now remain to reach the export port of

Montreal.—Mayor G. C. Wright, of Kingston, conferring the freedom of the city on W. H. Coveale, president of Canada Steamship Lines aboard the freighter on arrival. Bottom: "The practical consummation" of the ceremony. S.S. Lemoyne prepares to unload her cargo of 532,000 bushels, shipped by James Richardson & Sons, of Winnipeg, at Kingston's new elevator which has already, for 1932, handled 4,000,000 more bushels than it did in the whole of the preceding year.—All photographs by Canada Steamship Lines.

REACH HIGHEST ALTITUDE EVER ATTAINED BY MAN

Cavallari Di Monzarrano, Italy.—Auguste Piccard and Max Cosyns came down to earth Thursday afternoon, August 18, having gained over the world from the greatest altitude ever attained by man—more than 10 miles.

When they landed they were somewhat shaky, very tired, and exceedingly modest. Swarms of persons, including government officials who came by aeroplane, descended on them, but neither Piccard nor Cosyns was in a mood to accept applause.

Professor Piccard made certain the balloon which had taken him into the stratosphere was well cared for and that his delicate scientific instruments, which may have recorded evidence to indicate whether the universe is dying or immortal, were safe.

Then he telephoned his wife, who until recently had been reluctant about allowing him to repeat the dangers he encountered on his first stratosphere flight last year. After that he revealed a little about his amazing experience.

He said that three hours after they took off Thursday morning, August 18, from Dübendorf, across the Alps in Switzerland, they reached their maximum height. From that vantage point the world was a strange looking place. Landmarks were indistinct and maps were of little value.

Only the large lakes below him served to indicate to Professor Piccard exactly what part of the earth he was over. He recognized Lake Garda, 12 miles northwest of this village, and decided to land. It took him more than two hours to bring him down his balloon.

"We are very well satisfied with our flight," the professor said, while hundreds of gaping farmers stood about staring at the men who had been far above the rain and the clouds in a little aluminum ball attached to a balloon.

Their altitude was 10,700 metres, or 54,776 feet. On the professor's first flight last year the top height was 51,793 feet.

Professor Piccard, 48 years old, lean, his head crowned by a shaggy mass of hair, and his 25-year-old assistant, took off at 5:06 o'clock Thursday morning, August 18, (11:06 p.m. Wednesday, August 17, eastern standard time). They were in the air about 12 hours.

When the balloon had been deflated after the landing here and safely folded up, and the instruments had been taken care of, the professor and his assistant motored to Desenzano.

It was almost midnight when they left. Their every move had been watched by the crowds of stocky peasants to whom this was a most extraordinary matter, for on peasants are not newspaper readers and they had no idea what the queer globular carriage represented.

Along about midnight the balloon and aluminum ball were loaded into an air force truck and hauled to the aviation school in Desenzano, where they were placed in a hangar. Neither Piccard nor Cosyns were to leave the spot until their apparatus had been stowed away.

Fins Leave For Russia

Hundred From Ontario Confront Soviet Will Supply Work

Halifax, N.S.—Sporting red silk rosettes attached to their clothing by a small star with a sickle and hammer device, 100 Fins from Ontario set sail on the SS. Kangsholm to work in Soviet Russia.

With few exceptions they declared themselves confident work would be provided for all as soon as they arrived in the land of the Soviets.

To Test New Airplane

Berlin, Germany.—An aeroplane which will retract the steps of a vehicle to study the flight of birds is awaiting a trial at Tempelhof Aerodrome. It has a wing construction approximating the wings of a seagull and its aim is to secure greater stability in the air. Hans Richter, pioneer glider flyer, is the designer.

Welsh Coal For Winnipeg

Winnipeg, Man.—A trial shipment of 1,500 tons of Welsh anthracite coal to heat Manitoba homes has arrived in Fort William and will soon be brought to Winnipeg by rail, according to an announcement made by the Winnipeg Supply and Fuel Co. It will replace hard coal formerly imported from the United States it was stated.

W. N. U. 1956

Mounties May Police B.C.

Would Bring Whole Of Western Canada Under Federal Force

Victoria, B.C.—Consideration of turning over to the Royal Canadian Mounted Police the policing of British Columbia is under consideration of the department of the attorney-general. It was definitely learned here. The development is one of the results of the Kidd report on British Columbia finances, it was stated.

The arrangement proposed provides the abolition of the British Columbia Provincial police and 30 municipal police forces, all of which cost \$1,700,000 annually. City police forces of Vancouver and Victoria would be continued as at present.

Completion of an agreement for policing British Columbia by the Royal Canadian Mounted would bring the whole of western Canada under the federal force. Saskatchewan turned over its policing to the Royal Canadian Mounted Police almost four years ago, while Alberta and Manitoba provincial forces were absorbed this spring.

For National Bank

Native Sons Of Canada Want Revision Of Canadian System

Quebec, Que.—The Native Sons of Canada want revision of the Canadian banking system.

After lengthy discussion, the organization in convention here adopted a resolution embodying the following points:

(1) Creation of a national banking commission having discretionary powers over all matters pertaining to all Canadian banks;

(2) Creation of a Canadian national bank, to serve as a reserve bank;

(3) Greater protection for bank depositors together with stricter governmental surveillance of banking practices.

Lack of interest shown by Canadians in Dominion Day, and refusal of some industrial and business firms to declare a holiday on that day was deplored in another resolution adopted by the convention.

S.S. Pennyworth Arrives

Docks At Churchill With Miscellaneous Cargo

Churchill, Man.—With a miscellaneous cargo in her holds consigned to western Canada points, the British steamship "Pennyworth" docked here after an uneventful voyage from Liverpool. Unloading operations are already under way. Later she will be loaded with 250,000 bushels of grain for the return voyage to the old country.

Six freight steamers will call at Churchill, the new Canadian ocean port on Hudson Bay, during the present season of navigation. It was announced Wednesday, August 17, by Hon. Dr. R. J. Manion, Minister of Railways and Canals.

Estate Will Be Auctioned

Large Property Of Earl Of Egmont To Be Sold

London, England.—Calverton estate, a property in Buckinghamshire belonging to the Earl of Egmont, is to be sold by auction, it was announced recently.

The youthful "Rancher Earl," who succeeded to the title on the death of his father four months ago, has returned to Canada and is living on the Alberta ranch at Priddis, where "Mr. Percival" farmed until he became the 10th earl in 1929.

Calverton estate covers about 461 acres, with a small residence, three farms, 32 country cottages and some valuable building land.

New Shotgun Device

Youthful Inventor Claims Weapon Can Fire 400 Shots A Minute

Chicago.—A 20-year-old junior college student is inventor of a device which he claims will convert an ordinary shotgun into a death-dealing device capable of shooting its customary ammunition at the rate of 400 shots a minute—and has pledged himself to keep it from gangsters and criminals.

The inventor, Charles A. Michal of suburban Elmhurst, said the device can easily be attached to any shotgun. It has been submitted to local police departments for thorough tests.

African Explorer Dead

New York.—A special cable to the New York Times, reported the death at Bournemouth, England, of Capt. Poulet Weatherly, geographer and African explorer, who discovered the source of the Congo at the age of 72.

Mutual Preferences

Committee On Foreign Relations Makes Recommendations

Ottawa, Ont.—The Imperial Conference committee on foreign relations is understood to include in its report recommendations that:

(1) No treaty obligations into which the empire countries might enter in the future should be allowed to interfere with any mutual preferences which the governments of the commonwealth might agree upon.

(2) The empire countries will free themselves from any existing treaties as might interfere with mutual preferences which may be agreed upon.

The United Kingdom has trade pacts giving most favored nation treatment to Soviet Russia and Argentina. No treaties, though, are specified in the report.

Lancaster Is Acquitted

British Flyer Is Freed On A Charge Of Murder

Miami, Fla.—Captain W. N. Lancaster, British flyer, was freed on a charge of murdering Helen Clarke, young writer and his rival in love, Wednesday, August 17, by a verdict which precipitated a court room demonstration that threatened to go beyond the control of bailiffs.

The 12-man jury deliberated four hours and 48 minutes before acquitting him on one complete ballot.

He had been on trial since August 2 in one of the most sensational hearings in the history of South Florida—a trial that brought out the secret love lives of himself, Helen Clarke, and Mrs. Jessie M. Keith-Miller, Australian aviatrix in full detail.

Export Flour Unloaded

First Shipment Arrives At Churchill For Overseas

Churchill, Man.—In the presence of several Canadian National Railway officials the first Canadian flour ever shipped out of the north was unloaded from a special train in the new freight shed.

The shipment comprised 31 cars from Robin Hood Mills, Saskatchewan and Moose Jaw, destined overseas.

ITALY PLANNING TO SCRAP THIRD OF ENTIRE FLEET

Rome, Italy.—One hundred and thirty thousand tons of Italy's fighting ships—practically one-third of the entire navy—will be retired under a programme beginning August 25. The purpose is to save money.

When the programme has been completed, Italy will be without a single battleship. The "Andrea Doria," 23,700 tons, and her sister ship, the "Duilio," which were rushed to completion in 1915 when Italy entered the world war, will be placed out of commission. Under the Washington treaty, Italy has the right to 170,000 tons of battleships, but she has elected to disregard this category in favor of heavy and light cruisers.

A report presented to the disarmament conference showed that the whole Italian navy totals 404,005 tons, including 20 ships still under construction. The need for economy was indicated by the fact that some new ships are intended for retirement. These are four of the 12 2,000-ton destroyers of the newest Italian type.

OUR SAILOR KING

An unusual picture showing King George at his favorite sport. He is seen aboard his yacht "Britannia" during the racing at Cowes, during which the royal craft carried off first honors. His Majesty is shown lending a hand at the ropes.

CALLS FOR MORE TREES

Hon. James F. Bryant, as Chairman of the Saskatchewan Commission on Conservation, is advising the farmers of that province that the present is the time to go in for a tree planting campaign. He lays particular stress upon the use of Caragana hedges to stop soil drifting.

Retrenchment Programme

Manitoba Government Plans Drastic Cut In Expenditures

Winnipeg, Man.—Government members of the Manitoba legislature met in the first caucus since the election, to pass on a retrenchment programme planned by the government of Premier John Bracken, involving a saving of somewhere between \$500,000 and \$1,000,000.

Previously, Hon. D. G. McKenzie, Minister of Agriculture and Hydro, had announced for purposes of economy his department will not send an exhibit to the Royal Winter Fair at Toronto this winter, this move will result in a saving of some \$5,000.

Falling revenues since the estimates were submitted in the legislature last spring have made necessary drastic cuttings in Manitoba government expenditures. For instance, more than 3,000 fewer passenger cars are being operated in Greater Winnipeg this year, and 12,600 fewer passenger cars for the whole province, according to figures on motor vehicle licenses obtained by the Manitoba tax commission.

Irish Tariff War

President De Valera Showing Little Interest In Question

Dublin, Ireland.—If fresh overtures are made for negotiations to end the tariff war between the Irish Free State and the United Kingdom, they must come from London. This is the general understanding in official circles here.

Concentrating on internal problems, President Eamon de Valera has shown little interest so far in the question of reopening negotiations. He is said to be well aware of the difficulties confronting his new policy, now that retaliatory tariffs on both sides have dislocated trade across the Irish Sea. Default of Free State land annuities to Britain started the difficulties.

Explorer Will Be Honored

Toronto, Ont.—Etienne Brule, French explorer, who came down the Humber River here in September, 1613, the first white man to look upon Lake Ontario, will be remembered in a memorial to be unveiled here September 17. Plans have been completed for the unveiling, which will be under the auspices of the Women's Canadian Historical Society.

Braving Ocean In Canoe

Two Scandinavian Sailors Leave Montreal For Vancouver

Montreal, Que.—Braving the dangers of the Atlantic and Pacific oceans, two experienced Scandinavian sailors left here August 16 in an 18-foot canoe en route to Vancouver via Cape Horn. The navigators, Helge Borup, 42, Danish sailor and news-bureau editor, and Harold T. Jensen, 38, a veteran ship's officer, expect to complete the journey in about two years.

The craft, an Ontario product, is equipped with a sail, outrigger and rudder and will carry the two men, who weigh about 200 pounds each, together with 800 pounds of equipment made up of a tent, clothing, fishing line, camping utensils and modern navigation instruments.

The two plan to sail down the St. Lawrence River, through the Gulf of St. Lawrence, along the coast of the Maritime provinces and New England states to Boston and New York, where stops will be made. Their itinerary will then take them to Key West and thence to Havana, Cuba.

From the Pacific Coast they intend entraining to the Thunder Bay district for inland water voyage back to Montreal.

Jensen navigated the Amazon River alone from its source to the sea in 1924.

German Political Situation

Hitler Says He Will Not Use Storm Troops To Gain Power

Berlin, Germany.—Chancellor Franz von Papen has received assurances Adolf Hitler will not use his storm troops to seize political power, but in any event he will not hesitate to suppress any revolt by force of arms.

The chancellor made this assertion in an interview in which he vigorously reiterated Germany's demand for equality in armaments with other nations, declaring the fatherland no longer could submit to being treated as a second-class nation.

Although the cabinet situation still is in a state of flux and there is no telling who will rule Germany after the new Reichstag has been called into session late this month, the chancellor appeared serenely confident his government would stay in power.

Asked whether he expected to be chancellor next Christmas he said: "We shall be in office for a long time."

Grant Provided For

Money For Grain Show Will Be Available As Required

Ottawa, Ont.—The balance of \$140,000, which remains of the Dominion grant for the world grain show, to be held in Regina next year, will be made available as required.

A vote was put in the estimates last year for \$150,000, and \$10,000 of this has been paid over. This has been announced at the Department of Agriculture.

The management of the fair is in the hands of an executive committee headed by Hon. W. C. Buckle, Minister of Agriculture in Saskatchewan.

CONSIDER PLANS FOR FINANCING DIRECT RELIEF

Winnipeg, Man.—Special sessions of the three prairie legislatures may be called this fall to consider a plan to finance direct unemployment relief if the Federal Government does not continue arrangements made last fall, according to reports in official circles here.

Under an agreement the Federal Government, province, and municipalities each were to pay one-third, the Dominion Government in addition agreeing to assist the province to finance its share. The Dominion Government later notified the province that it did not propose to continue this arrangement after April 1.

Each of the prairie governments now is confronted with the situation of being unable to borrow for relief purposes except on bank overdraft, and under the circumstances this is not possible.

Calgary, Alberta.—Representatives of the four western provinces and cities may meet Premier R. B. Bennett to discuss unemployment relief when the Prime Minister comes to Calgary about the end of August.

Provincial delegates had planned to meet the Prime Minister at Ottawa, but following a report that Mr. Bennett would be in the city in less than two weeks, it is expected representatives will seek an appointment here.

DELEGATES ARE ENTERTAINED AT THE CAPITAL

Ottawa, Ont.—Tributes to the people of Ottawa for the hospitality they have extended to the delegations attending the Imperial Conference and to all the efforts put forward to make the sojourn of the conference pleasant and comfortable were voiced at the luncheon tendered by the mayor and corporation of the city to the delegates. The beauties of Ottawa, its natural environment and its dignified public buildings, had impressed the visitors.

Sean T. O'Kelly's remarks were also in lighter vein. He felt, he said, that he dare not refuse to speak at the luncheon because the Irish Free State was "so seldom heard, and gets very little publicity."

"We have to fight hard for the small share of sunlight given to us," Mr. O'Kelly declared, "and if I lost this opportunity I would soon hear of it."

Ottawa, said the Free State leader, was "almost too beautiful a setting for the sordid occupations of an economic conference."

Hon. N. C. Havenga of the South African delegation, Rt. Hon. J. G. Coates of New Zealand, Hon. P. C. Aldridge of Newfoundland, Hon. H. W. Moffat of Southern Rhodesia and Sir Atul C. Chatterjee of India also spoke.

The addresses were closed by Rt. Hon. R. B. Bennett, who thanked the city and the people of Ottawa for their co-operation in the work of making the visitors feel at home.

French Steamer Sails

Leaves Churchill Bound For France With Cargo Of Wheat

Churchill, Man.—While the holds of the British steamer "Pennyworth" are being filled with flour, rolled oats and wheat at this new northern port, the French steamer "Sierrentz" is plying northwest through the waters of Hudson Bay with a cargo of wheat bound for Le Havre. The "Sierrentz" was the first boat to arrive this season and the first to leave.

Her load of 250,000 bushels of No. 1 Northern wheat is consigned to L. Dreyfus, the French grain importers and before leaving Captain P. A. Mege indicated the Dreyfus company would likely send in more ships during the season.

The "Pennyworth" brought the first inbound freight to enter the new port, 500 tons of miscellaneous goods. It included Scotch whisky for the Manitoba and Saskatchewan liquor commission, chinaware, glass, motor oils and electrical equipment. The goods will move out by rail shortly to Regina and Saskatoon.

Britain Would Tax Road Users Heavily

Railway and Highway Authorities Propose Higher Levy

London, England.—Heavy additional taxation on users of the public highway is proposed in the report of a joint conference between railway and highway authorities in Great Britain, issued recently.

"Mechanically propelled vehicles" should pay \$240,000,000 a year toward the cost of roads, the report recommends. Of this commercial vehicles should pay \$94,000,000 and others \$146,000,000. The report urges a much heavier tax on commercial vehicles, particularly the larger type.

Not Afraid Of Weight

Toronto, Ont.—Life guard Tom McGarry is not afraid of size when called on to rescue some one in distress. Hearing cries for help as he patrolled his section of the lakefront here, McGarry responded and brought to shore William Cuppy, 47, whose estimated weight in his bathing suit was 315 pounds.

Faithful To Duty

Toronto, Ont.—Faithful to the last minute of a quarter century's service, Engineer Dave Martin fought off a heart attack as he brought his fast Canadian National freight train into Toronto from South Ferry Sound. As the locomotive pulled into the Union Station, Martin fell dead on the floor of his cab.

Date Of Race Advanced

Hamilton, Ont.—At the request of W. L. Detroit speed-boat driver, the first race of the Hamilton trophy races on Lake St. Clair will be run on Saturday, September 3, instead of the previous Friday, as originally scheduled.

Wheat Situation

Many Factors Leading To Accumulation Of Heavy Wheat Surplus

The marketing of this year's wheat crop, which is unofficially estimated at from 400 to 450 million bushels, will present a problem of large proportions. In addition to this year's crop there is a carryover of more than 100 million bushels from last year. This is a reduction from the stocks on hand in Canada a year ago, but world stocks, estimated as at July 1st by the U.S. Department of Agriculture at 640 million bushels against 656 million bushels in 1931, are heavy. Argentine and Australian supplies, as well as Canadian, are smaller than last year, but these decreases are partially offset by an increase of 40 million bushels in the United States.

Conditions in the United States have been unfavourable in the winter wheat area and the outlook of this crop was officially estimated at 432 million bushels as at July 1st, against 789 million bushels in 1931, and a five-year average of 549 million bushels. Acreages sown to spring wheat were increased over 1931 and the outlook for this crop is much better. The indicated production of all wheat is placed at 737 million bushels against 894 million bushels last year and a five-year average of 820 million bushels. Domestic requirements practically approximate the total wheat crop. Exports from the United States since 1900 have never failed to exceed 125 million bushels a year. These conditions suggest a substantial reduction in United States stocks during the coming crop year.

Crop conditions in Western Europe have been favourable, but unfavourable in the Danube Basin. The total acreage sown to wheat in some of the less, but for the whole of Europe harvests are expected to be about the same as last year. While wheat production in France, Germany, Spain, Belgium and Holland is estimated at 657 million bushels as compared with 580 million bushels in 1931, the crops in Roumania, Hungary, Bulgaria and Yugoslavia are unofficially placed at 245 million bushels against 284 million bushels a year ago. Unfavourable weather has since been reported in Italy and France, but the outlook will be large. The wheat crop in the United Kingdom is officially reported as below average. In Russia, sowings of winter wheat were larger than in 1931, but spring operations were beset with difficulty and the total area sown is estimated at 6 million acres less than last season. Production is expected to be about 1,000 million bushels. Home consumption of white bread is being encouraged and it is said that it is unlikely that Russia will be able to increase wheat exports. Shipments during the current season to July 23rd have amounted to 71 million bushels as compared with 91 million bushels to the corresponding date last year.

Persisting surplus has characterized the world wheat situation during the past four years. Available supplies have continuously exceeded annual requirements, even after large diversions into lower price outlets, such as increased use as animal feed, heavier consumption in India and greater exports to China. Imports by China in 1931, amounting to 50 million bushels, were the largest on record—eight times greater than in 1920, and four times those of 1929. Canada supplied 15 per cent. of China's imports, United States 18 per cent., and Australia 65 per cent. The bumper wheat crop of 1928 was mainly responsible for the emergence of these huge surplus supplies. Economic depression since 1929 has contributed to the persistence of the problem, but widespread foreign restrictions upon imports have been the major influence tending to hold down total consumption. Russian exports, the outcome of the Soviet policy, have been important during the past two years. Measures of other nations have caused contraction of consumption or restrained its expansion, stimulated home production and increased the burden of the surplus. Since the solu-

tion of the problem of wheat surplus seems to be dependent upon increased consumption rather than upon a general decrease in production, the desired balance may have to await a restoration of a more normal state of international trade.—Donald M. Marvin in Royal Bank of Canada News Leader.

Slavery Still Exists

Great Britain Taking The Lead To Stamp Out This Evil

The popular idea is that there is little or no slavery left in the world in these days. Most people imagine that slavery was abolished many years ago. But that is quite a fallacy, and the fact that 100 years have passed away since slavery was abolished in the British Dominions prompts reflection upon the immense task that remains to be overtaken before slavery is stamped out all over the world and no man or woman be in physical thralldom to another.

A recent decision of the League of Nations to pursue a relentless campaign against the continuance of slavery anywhere in the world is said to involve the ultimate freeing of 5,000,000 slaves. Sir Arnold Hodson, Governor of Sierra Leone, has declared that slave raiding is as horrible today as it ever was. Missionaries tell of practices that accompany the owning of slaves in some parts of the world, notably the interior of Africa, which include "torturing to death," boiling oil being poured down slaves' throats, and "branding them with red hot irons." Slavery in various forms exists today in China, Arabia, Liberia and Abyssinia. In China especially there is hope that public opinion will bring about the abolition of the practice of the owning of slave girls. But there is a great deal of effort needed before present-day slavery is utterly abolished. In some cases slavery is embodied in the customs of the countries implicated, and century-old conservatism will need to be overcome—no light task.

It is encouraging to know that Great Britain has taken the lead in the effort to stamp out this evil, an evil so obnoxious that it cannot be contemplated with anything but repugnance by any modern civilized person. Forty nations have agreed to join hands in the effort. Surely every man or woman with influence in the world at all will enlist that influence in this noble cause and the voice of popular approval be heard on behalf of the labors of those who strive to uproot this age-old reproach on humanity.—Regina Leader-Post.

Proposal To Divert

Northern River Waters

Channel Of Ogoki River In Ontario May Be Changed

The proposal to divert the waters of the Ogoki River from their natural channel leading to the sea at James Bay into another route which will lead them to the Great Lakes by way of the Nipigon River has, because of its unusual and spectacular nature, received much public attention in the past few days.

There has been much comment on the additional horse-power that will be provided, the total being estimated at some 200,000. The horse-power thus to be made available is not, however, at the present time an important item because there is no pressing need in that direction. Northern Ontario has so much potential electric power now undeveloped that a little more or less makes no difference. The diversion and addition of 4,000 cubic feet per second to the waters of the Great Lakes will be important because of its effect in maintaining levels which would be in danger by the deepening of channels which at once means heavier outflow.

Carrier Pigeon Aids Police

Releasing a pigeon from an aeroplane, policemen of Frankfurt-on-Main, Germany, followed the bird and located the neighborhood of a blackmailer who had demanded a large sum from a member of the consular service. The pigeon had been sent in a box with a blackmailing note so that it could carry back the money. On the return of the bird the blackmailer wrote the consul a threatening letter. He was traced definitely by it, and now is serving a term in prison.

An instrument has been invented that measures to the 3,000,000th of an inch it should be useful to a motorist trying to find a place to park his car.

In San Marino, oldest and smallest republic in the world, no clock strikes more than six consecutive times, due to the fact that the day is divided into four parts of six hours each.

FAMILY TO ATTEMPT OCEAN HOP

The "flying family" of Hutchinsons in front of their new twin-motored Sikorsky amphibian plane, in which they will shortly attempt to fly the Atlantic. Col. George Hutchinson with his wife and two daughters, Kathryn, eight, and Janet, six, will take off from Washington with London as their destination. They plan to stop at Labrador and Greenland and will be accompanied by a radio operator and a co-pilot.

The Mystery Of Stonehenge

Scientists Fail To Throw Any Light On Its Origin

The ghosts who inhabit Stonehenge must have chuckled in their transparencies—or whatever it is a ghost wears to keep out the cold—as they listened to 100 of the world's leading archaeologists wrangle over the origin of the strange monument of monoliths that rears itself in the centre of Salisbury Plain. The day formed the climax of an international congress of scientists, and the theme was one that provoked violent argument. But to no avail. As one eminent gentleman put it at sunset: "All our evidence is insufficient."

So Stonehenge joins the Sphinx, the Stone Men of Java and a few other ageless marvels concerning whose origin man has no actual knowledge. Druids may have sacrificed upon its huge horizontal stone; goblins of the English forests who peered from the undergrowth when Rome was young may have used it as a meeting-place; but who built it, when and why these questions remain among the eternal riddles of time. But that will not prevent the scientific gentlemen from continuing to conjecture. Indeed, they will regard Stonehenge with more favor now than ever, since it is something about which they can always argue—and never agree.—Montreal Star.

Upheld His Reputation

Old Horse Kept Idea Of Economy To The Last

An old fire horse, Sandy, demoted to pulling the garbage wagon in Evanston, Illinois, when the department was motorized, lived up to his reputation to the last. During his 30 years of service, Sandy seldom ate more than a pint of oats and one forkful of hay. When his old age and feebleness made him too much of a burden he was taken out to be shot—but saved the city a bullet by dropping dead at the incinerator.

Explorer: "From the Chinese frontier we pushed into Tibet."

Sympathetic Lady: "We had a car like that."

Not Afraid Of Work

Ninety-Year-Old Winnipeg Woman Deplores Being Idle

"Isn't it awful that I have no work to do," is the plaint of Mrs. Christian McMillan, who celebrated her 90th birthday in the spring.

Mrs. McMillan came to Winnipeg with her husband in 1885 from Waterville, N.S., and since then nearly 5,000,000 yards of yarn have passed through her fingers as she plied her spinning wheel. In the summer months of every year she still spins, making the yarn she knits into gloves and mittens for her family.

In her early days Mrs. McMillan did weaving as well as spinning, using her own-made wool to fashion family blankets and even the material from which the men's suits were made. But now she, who has covered nearly 3,000 yarn miles, looks dejectedly at the gloves she is making and says: "This isn't work; this is only passing the time."

Fully Certified

Frenchman Has Various Papers To Prove His Legal Entity

One of the things that the French find most difficult to understand about themselves—indeed, they never quite do—is that we can go through life without any "papers." From birth to the grave a Frenchman is docketed; starting with entry in his father's "carnet de famille," at the age of 18 he gets a "carnet militaire," to be followed by a "carte d'électeur." When married he himself receives a "carnet de famille"; and these various papers he must keep religiously or risk, in extreme cases, losing his legal entity. He can, if he likes, get a "carte d'identité," and is, in any case, accustomed to carry three or four documents having the same effect and certified by the police.—London Saturday Review.

With a view to lessening the early morning noise of rattling milk bottles, a rubber company has devised rubber-covered milk carriers.

Agricultural workers in Cuba are being paid from \$200 to \$400 a year.

Scientists Get Thrills

Father Hubbard and Party Explore Active Crater Bed

After conquering Aniakchak, the largest active crater in the world with its circumference of 21 miles and a drop of 5,000 feet from rim to floor, to return with an official record of the highest crater bed temperature known to man, Rev. Father Bernard R. Hubbard, S.J., Glacier priest of Santa Clara University, arrived recently in Victoria after five months of scientific exploration packed with thrills and incident. With him were Professor Rod Chisholm, cartographer of San Francisco University, and "Margo" and "Kalmi" malamute dogs sharing their adventures.

Father Hubbard gave a summary of the remarkable results of the 1932 expedition from Santa Clara University to Rev. Father Gales, S.J., Rod Chisholm, Kenneth Chisholm, and Edgard Levin of his immediate party and others who had helped in the work.

Father Hubbard guided the Santa Clara party to the scene of its greatest success. Inside the crater, where 3,000 feet below its rim the party found temperatures high enough to melt tin, zinc and copper by roaming out a hole twelve inches deep in the bed of ashes. Copper has a melting point of 1,089 degrees centigrade. The party was successful in using a copper wire and a disc within a few minutes. Nearby issued blue vapors, indicating temperatures still higher, possibly over 2,000 degrees.

It was at Aniakchak that Father Hubbard showed his party the new fumarole which he had predicted in 1931 for this year. Three miles in extent, the fumarole from the most recent eruption stood yawning on the floor of the main crater, with its dozing ridges of gasses inside. Two hours were spent in exploring the fumarole, hours hung with menace from the poisonous fumes, the party taking exhibits and samples of sulphide and gasses for analysis later.

While inside the crater the party had braved death many times from chlorine, sulphur dioxide and other gasses, while around them lay snow birds, trapped by the deadly fumes. One malamute became overcome and was rescued with nothing more serious than scorched pads to his feet. Due to the insulating bed of ashes, crater beds were passable, but a few inches below the surface temperatures as high as 600 degrees centigrade were common, while copper fusing test was made at only one foot below ground.

More Automobiles

On Canadian Farms

Statistics Show Number Has Doubled in Ten Years

Automobiles on farms in Canada have doubled in the past 10 years and there is now a car for every 2.27 farms, figures issued by the Dominion Bureau of Statistics show. There are 726,623 farms in the Dominion and on them, 321,306 automobiles.

Ontario has more cars to the farm than any other province, with an average of one for every 1.53 farms, and Quebec has the smallest ratio, with one for every 5,106 farms. Saskatchewan ranks after Ontario, with one in 2.10; Manitoba, 2.12; Alberta, 2.28; British Columbia, 2.46; New Brunswick, 3.26; Prince Edward Island, 3.31; and Nova Scotia, 3.33.

The number of farms with tractors in Canada has increased from 43,578 in 1921 to 97,176 in 1931, an increase of 123 per cent. Similarly, the number of tractors has increased from 48,455 to 105,059 for an increase of 121.4 per cent. in the same period. There is one binder for every 2.69 farms, and one threshing machine for every 9.64 farms in Canada.

Printing Paper Money

Paper money is now printed from chromium surfaced plates. The design is first engraved on a steel plate, from which a negative is made by depositing electrically, first nickel, and then alternating layers of copper and nickel. This negative serves as a mold upon which an electrolytic printing plate is deposited. This plate is plated with chromium, and duplicates the original steel engraving.

Luke—My wife explored my pockets last night.
Mike—What did she get?
Luke—Same as any other explorer—enough material for a lecture.

Even in 2000 B.C. they used bath towels. This is borne out in findings in an Egyptian tomb by an expedition of the Metropolitan Museum of Art.

Waterproof roof, made by treatment of rubber, is being turned out by a process developed in England.

A New Market For Flax

Ireland May Get Supply From Canada Instead Of Russia

Canada may become a serious competitor with Russia in the sale of flax to Ireland, says the Hamilton Spectator. Lewis Gray, a member of the Northern Ireland delegation to the Economic Conference, visited the flax-growing district in Ontario to ascertain the possibilities of the Canadian product. Flax for fibre has been cultivated in Canada since the first days of New France. It is grown by the Doukhobors of the West, who learned the art of its cultivation and harvesting in Russia. It has been grown successfully in Nova Scotia and New Brunswick, has been shipped to Ireland from Quebec, and flax fibre seed sold in that country by Ontario. Most of the Canadian flax is grown in Western Ontario, hence the visit of Mr. Gray to that district. He addressed the growers there and from the discussions which will result Ireland and Canada may mutually benefit. The reason why flax has not been grown more extensively in this country is the number of processes required to prepare the fibre for spinning which makes the cost of labor high. The Russian peasant has here the advantage, perhaps, but if some flax can be sold to Ireland, as it has been, it is hard to see why the trade cannot be extended. The quality of Canadian flax is good. Energy, initiative and good management on the part of the Ontario grower may enable him to compete successfully with the grower in Russia. Opportunity would seem to be knocking on the door of the Canadian flax-grower.

Fine Salvage Feat

Lone Diver Working On "Laurentie" Wreck Off Donegal Coast

Much admiration was expressed over the great feat of the Italian salvage crew in wresting many millions of dollars worth of bullion from the British liner, "Egypt," off the French coast, and another feat is being performed off the Donegal coast of Ireland by a lone diver, which is equally worthy of praise.

The White Star liner "Laurentie" was torpedoed by a German submarine in 1917, and sank in the west of water. The British Admiralty, with all its equipment, salvaged twenty-five million dollars worth of gold, then gave up the job in 1918, leaving another million dollars below.

About one year ago a small syndicate of Londoners hired a tug more than sixty years old, a tug crew and one diver. The water is always rough, there is a constant eddy at the bottom which has made the sand as hard as concrete, and it is only possible to stay down a few minutes at a time. The rough eddy shifts the wreckage, so that the diver has to grope about for his bearings a constant way every descent. The preparatory work that he has done on trip may be undone by the time he is able to go down again.

But recently he salvaged a gold ingot worth \$100,000.

It is a hard struggle, but the reward is high.—St. Thomas Times Journal.

Danger On Old Tires

"A blowout on the front tire of an old model coupe on the Kingston Road resulted in one person being killed and six injured." That is a not uncommon story. It is dangerous to go at high speed with worn-out tires and it is difficult to go at other than high speed on the highways. Tires are cheaper and old motorists owe it as a duty not only to themselves but to their passengers to make sure that they are in serviceable condition.

Making Processed Cheese

The annual "processed" cheese manufactured in Canada last year amounted to 12,048,012 pounds, of which 1,148,316 pounds were exported. There are eight firms now producing the type of cheese known as Swiss in Ontario, one in Quebec, and one in Alberta. "Processed" cheese is made from ordinary Cheddar.—Department of Agriculture, Ottawa.

The New Television. "This is a wonderful apparatus, you can see how your drafts for outstanding debts are going."—Lustige Blätter, Berlin.

He: "Courtesy is the soul of married life, so of you wish to throw something at my head, kindly ask my permission first."—Buen Humor, Madrid.

"WOMEN CAN BE CHARMING AT ALMOST ANY AGE"

says Frances Starr

"Of course I am 39," says Frances Starr, famous stage and screen star. "Years matter so little nowadays if a woman knows how to guard complex lovefulness."

"Every actress knows that regular care with Lux Toilet Soap will do wonders for her skin. I use it regularly."

Of the 694 important Hollywood actresses, including all stars, 686 use this fragrant white soap. You will want to try it—at just 10¢ a cake!

"I'm 39—"

THE HOUSE OF DREAMS-COME-TRUE

— BY —
MARGARET PEDLER
Author of
"The Splendid Folly," "The Hermit"
Hodder & Stoughton, Ltd., London.

CHAPTER XXIX.—Continued.

And then Jean found herself resting against the curve of Blaise's arm, with the roars of the shoulders, firm and solid as a rock beneath her. "All right?" queried Blaise, gathering up the reins in his left hand. "Lean well back against my shoulder. There, does that?"

"It's like an arm-chair." He laughed. "I am afraid you won't say the same by the end of the journey," he commented ruefully.

But by the end of the journey Jean was fast asleep. She had "leaned well back" as directed, conscious, as she felt the firm clasp of Blaise's arm, of a supreme sense of security and well-being. The reaction from the strain of the afternoon, the exhaustion consequent upon her flight through the mist and the fall which had so suddenly ended it, and the rhythmic beat of Orion's hoofs all combined to lull her into a state of delicious drowsiness. It was so good to feel that she need fight, and scheme, and plan no longer, to feel utterly safe . . . to know that Blaise was holding her . . .

Her head fell back against his shoulder, her eyes closed, and the next thing of which she was conscious was of being lifted down by a pair of strong arms and of a confused murmur of voices from amongst which she hazily distinguished Lady Anne's heartfelt: "Thank God you've found her!" And then, characteristically practical, "I'll have her in bed in five minutes. Blankets and hot-water bottles are all in readiness."

It was the evening of the following day, Jean, tucked up on a couch and with her strained ankle comfortably bandaged, had been reluctantly furnishing Blaise with the particulars of her experience at the bungalow. She had been very unwilling to confide the whole story to him, fearing the consequences of the Tormarin temper as applied to Burke. A violent quarrel between the two men could no good, she reflected, and would only be fraught with unpleasant results to all concerned—probably, in the end, securing a painful publicity for the whole affair.

Fortunately Blaise had been out when Judith had rung up earlier in the day to enquire if Jean had returned to Staple, or he might have fired a few candid expressions of opinion through the telephone. But now there was no evading his searching questions, and he had quietly but determinedly insisted upon hearing the entire story. Once or twice an ejaculation of intense anger broke from him as he listened, but, beyond that he made little comment.

"And—that was all," wound up

Jean. "And anyway, Blaise"—a little anxiously—"it's over now, and I'm none the worse except for the acquisition of a little more worldly wisdom and a strained ankle."

"Yes, it's over now," he said, standing looking down at her with a curious gleam in his eyes. "But that sort of thing shan't happen twice. You'll have to marry me—do you hear?"—imperiously. "You shall never run such a risk again. We'll get married at once!"

And Jean with a quiver of amusement at the corners of her mouth, responded meekly: "Yes, Blaise."

The next minute his arms were around her and their lips met in the first supreme kiss of love at last acknowledged—of love given and returned.

There is no gauge by which those first moments when two who love confess that they are lovers may be measured. It is the golden, timeless span when "unborn tomorrow and dead yesterday" cease to hem us round about and only love, and love's ecstasy, remain.

To Blaise and Jean it might have been an hour—a commonplace period ticked off by the little silver clock upon the chimney-piece—or half eternity before they came back to the recollection of things mundane. When they did, it was across the kindly bridge of humor.

Blaise laughed out suddenly and boyishly. "It's preposterous," he exclaimed. "Quite forgot to propose."

"So you did! Suppose"—smiling up at him imperiously—"suppose you do it now?"

"Not if I won't waste my breath when I might put it to so much better use in calling you beloved."

Jean was silent, but her eyes answered him. She had made room for him beside her, and now he was seated upon the edge of the Chesterfield, holding her in his arms. She did not want to talk much. That still, serene happiness which lies deep within the heart is not provocative of garrulity.

At last a question—the question that had tormented her through all the long months since she had first realized whether love was lending her, found its way to her lips.

"Why didn't you tell me before, Blaise?"

His face clouded.

"Because of all that had happened in the past. You know—you have been told about Nesta—"

"Ah, yes! Don't talk about it, Blaise," she broke in hastily, sensing his distasteful recoil from the topic.

"I think we must a little dear," he responded gravely. "You see, Nesta was not all to blame—not even very much, as I'm sure"—with a little half-tender smile—"my mother tried hard to make you believe."

"She did. And I expect she was perfectly right."

He shook his head. "The fault was really mine. My initial mistake was in confusing the false fire with the true. It—was not love I had for

Nesta. And I found it out when it was too late. We were poles apart in everything, and instead of trying to make it easier for her, trying to understand her and to lead her into our ways of looking at things, I only stormed at her. It roused all that was worst in me to see her trailing her name in the dust, throwing her dignity to the winds, craving for nothing other than amusement and excitement. I'm not trying to excuse myself. There was no excuse for me. In my way, I was as culpable and foolish as she. And when the crash came—when I found her deliberately entertaining in my house against my express orders, a man who ought to have been kicked out of any decent society, why, I let go. The Tormarin temper had its way with me. I shall never forgive myself for that. I frightened her, terrified her. I think I must have been half mad. And then well, you know what followed. She rushed away and, before anyone could find her or help her, she had killed herself—thrown herself into the Seine. Quite what happened between leaving her and her death we were never able to find out. Apparently since her marriage with me, her sister had gone to Paris, unknown to her, and had taken a situation as 'dame de compagnie' to some Frenchwoman, and Nesta, though she followed from Italy to Paris, failed to find her there. At least that is what Margherita Veldt told me in the letter announcing Nesta's death. Then she must have lost heart. So you see, morally I am responsible for that poor, reckless child's death."

"Oh, no, no, Blaise! I don't see that"—pitifully.

"Don't you? I do—very clearly. And that was why, when I found myself caring for you, I tried to keep away."

He felt in his pocket and produced a plain gold wedding-ring. On the inside were engraved the initials "B. D. and M. V." as a date.

"That was my taleman, Margherita sent it back to me when she wrote telling me of Nesta's death. Whenever I felt my resolution weakening, I used to take it out and have a look at it. It was always quite effective in thrusting me back into my proper place in the scheme of things—that is, outside any other woman's life!" There was an inexpressible bitterness in his tones, and Jean drew a little nearer to him, her heart overflowing with compassion. He looked down at it, but now—your've beaten me."

His lips rubbed her hair. "I'm glad to be beaten, beloved. . . I knew, that day at Montevana, what you might come to mean to me. And I intended never to see you again, but just to let that one day for remembrance. I felt that, having made such an utter hash of things, having spoiled one woman's life and been, indirectly, the cause of her death, I was not fit to hold another woman's happiness in my hands."

"I—gubbed her cheek against his shoulder."

"I'm glad you thought better of it," she observed.

"I don't know, even now, that I'm right in letting you love me—"

"You can't stop me," she objected. He smiled.

"I don't think I would if I could—now."

Jean leaned up and, with a slender, dictatorial finger on the side of his face, turned his head towards her.

"Quite sure?" she demanded satily.

Answer: "Blaise, I do love your chin—it's such a nice, square, your-money-or-your-life sort of chin."

Something light as a butterfly, warm as a woman's lips, just brushed the feature in question.

He drew her into his arms, folding them closely about her.

"And I—I love every bit of you," he said hoarsely. "Body and soul, I love you! Oh! Heart's beloved! Nothing—no one in the whole world shall come between us two ever again!"

CHAPTER XXX.

The Gateway

August seemed determined to justify her claim to be numbered amongst the summer months before making her exit. Apparently she had repented her of having recently velled the country in a mist that might have been regarded as a very creditable effort even on the part of November, for today the sun was blazing down on a cloudless sky and scarcely a breath of wind swayed the nodding cornstalks, heavy with golden grain.

Jean, her strained ankle now practically recovered, was tramping along the narrow footpath through the cornfield, following in Blaise's footsteps, while Nick brought up the rear of the procession. She had not seen Claire since her engagement had become an actual fact, though a characteristically warm-hearted little note from the latter had found its way to Staple, and this morning Jean had declared her inability to exist another day "without a heart-to-heart talk with Claire."

Hence the afternoon's pilgrimage

You said it! it pays to "ROLL YOUR OWN" with..

Thousands of delighted smokers say it because they have proved it, time and time again.

You can roll at least 50 cigarettes with a 20c. package of Turret Fine Cut cigarette tobacco.

And every cigarette you roll will be to your liking. The more you roll, the more you'll enjoy them.

15¢ and 20¢ packages
—also in 1/4 lb. vacuum tins

TURRET

FINE CUT

Cigarette Tobacco

across the cornfield which formed part of a short cut between Staple and Chamwood.

At first Jean had feared lest her new-found happiness might raise a barrier of sorts betwixt herself and Claire. The contrast between the respective hands that Fate had dealt them was so glaring, and the rose and gold with which love and sympathy decked Jean's own life seemed to make the bleak tragedy which enveloped Claire's appear even darker than before.

But Claire's letter, full of a quiet, unselfish rejoicing in the happiness which had fallen to the lot of her friend, had somehow smoothed away the little uncomfortable feeling of comparison which, to anyone as sensitive as Jean, had been a very real embarrassment. Nick's felicitations, too, had been tendered with frank cordiality and affection, and with a delicate perception that had successfully concealed the sting of individual pain which the contrast could hardly fail to have induced.

So it was with a considerably lightened heart that Jean, with her escort of two, passed between the gates of Chamwood and, avoiding the lengthy walk entailed by following the windings of the drive, struck off across the velvet lawns—smooth stretches of close-cropped sward which, broken only by branching trees and shrubbery, and underfenced by the drowsy foliage of symmetrical flower-beds, swept right up to the gravelled terrace fronting the windows of the house itself.

The two men lolled to discuss the points of a couple of young spaniels rollicking together on the grass, but Jean, eager to see Claire, smilingly declined to wait for them, and, speeding on ahead, she mounted the short flight of steps leading to the terrace from the lower level of the lawns. (To Be Continued.)

Canadian Cattle Exports

Exports of live cattle to Great Britain up to the end of June, 1932, totalled an increase of 898 over the total shipped in the first six months of 1931. The prospects are that shipments in the next few months will show a greater increase over the corresponding period last year.

Flax grown for fiber is a very different type from flax grown for seed.

Try Lydia E. Pinkham's Vegetable Compound

She's Up in the Air Again

Those she loves . . . are first to suffer when monthly pains shut out her nerves. Lydia E. Pinkham's Vegetable Compound would ease that awful agony.

Build Huge Telescope

Second Largest Telescope In the World To Be Erected Near Toronto

Details of the erection near Richmond Hill, north of Toronto, of the second largest telescope in the world, at an estimated cost of \$500,000 has been made public.

Officials of the University of Toronto to which Mrs. Jessie Dunlop is donating the David Dunlop Observatory in memory of her husband, announced construction would start at once on the two main buildings of the plant.

On a circular platform 800 feet above sea level, a round building 61 feet in diameter will be built to house the huge telescope, nearly all parts of which are being made in England. Larger than the one in the Dominion Government observatory, Victoria, B.C., the telescope will be on the reflecting type and will have mirrors weighing 5,000 pounds.

The telescope building and an administration building to be erected at a cost of \$125,000, will be located in the centre of a 177-acre plot, which will be known as the David Dunlop Park.

Counterfeit Coin

Spurious Fifty Cent Pieces Being Circulated At the Coast

The 50 cent piece is in a fair way to pass out of use as a legal tender in Vancouver until the flood of counterfeit coins of that denomination is stopped.

One large corporation is stated by police to have taken in more than \$100 worth of the spurious money, while other firms report acceptance of sums ranging from \$50 to \$500.

A number of persons detected passing the coins have been questioned by police, but in each case it was obvious they had accepted them innocently. Several months ago a spurious 50-cent piece of clever manufacture, bearing the date 1919, was found in circulation, and Royal Canadian Mounted Police succeeded in arresting and convicting the counterfeiter.

Within a short time, however, coins bearing the dates 1916, 1917, 1918, and of less clever disguise, appeared and have gained wide circulation.

Will Not Reveal Secret

J. D. Ames, retired marine engineer, of Houston, Texas, has turned his hobby into a money-making industry, in spite of present economic difficulties. Ames makes small ships and inserts them in quart bottles. He will not reveal his secret of constructing the models in the bottles, but he is able to sell all he can build.

France has 800 manufacturers of agricultural implements, about twice as many as before the war.

Little Helps For This Week

"We then that are strong ought to bear the infirmities of the weak." — Romans xiv. 1.

Ask God to give thee skill In comfort's art, That thou mayest condescend be, And set apart Unto a life of sympathy. For heavy is the weight of ill In every heart; And comforters are needed much, Of Christ-like touch.

— Anna E. Hamilton.

They who have undergone and overcome stand with their keys to open the portals of life's great emergencies to their brethren. The wondrous power of experience! And see how beautiful and ennobling this makes our sorrows and temptations. Every stroke of sorrow that issues into light and joy is God putting into your hand the key of that sorrow, to unlock it for all the poor souls whom you may see approaching it through all your future life. It is a noble thing to take that key and use it.

— Phillips Brooks.

Persian Balm tones and stimulates the skin. Fragrant as a flower. Cool as morning dew. Safeguards and beautifies the most delicately-textured skin. Creates complexions of exquisite charm. Adds a lovely finish to the daintiest woman. Invaluable for softening the hands and making them flawlessly white. Clean and refreshing. Daintily fragrant. Delightful to use. Chooses unhesitatingly by all women who care for feminine distinction.

Things Not Needed
Rt. Hon. Stanley Bruce would exclude from the Empire "certain foreign products." An exchange suggests that the list include German measles, Chinese puzzles, Russian Reds, Spanish 'flu, French leave and Dutch treats.

Only two British women, of the 200 women pilots licensed in this country, have been killed while in charge of an aeroplane, states the Royal Aero Club.

Algiers and France have just been connected by radio telephone.

"Buba," made from dates, has become the national drink of Libya.

Heat is Hard on Babies!

But Mothers Find Protection and Relief for Them in BABY'S OWN TABLETS

"When my children are overtired and restless in warm weather, I give them their dose of BABY'S OWN TABLETS at night, and in the morning they are happy and contented children and are a pleasure to cope with," writes Mrs. Mary Mason, Halifax, N.S.

Mrs. George H. Walker, Thom'sburg, Ont., says: "I have found BABY'S OWN TABLETS the best of all children's remedies for Summer Complaint, Colic, Teething and Constipation."

"BABY'S OWN TABLETS are excellent for children's summer complaints," writes Mrs. (Rev.) Connon, Bramford, Ont.

BABY'S OWN TABLETS can be given with complete safety to the youngest and most delicate child—see analyst's statement in each 25c package. They are recommended for summer illnesses, teething troubles, simple fevers, colic, upset stomachs, constipation, sleeplessness and irritability. Children take them as eagerly as they eat candy. More than 1,250,000 packages sold in 1931.

Make and Keep Children Well—As Mothers Know

Heard Around Town

R D. Vanhook was a business visitor at Calgary this week.

Mr. and Mrs. N. Steckle were guests at the home of Mr. and Mrs. W. A. Hurley, Saturday.

Mabel Gilbertson and Lorna Chapman are spending a holiday with Mrs. Shand, of Garden Plains.

Wm. Thompson, who is teaching west of Cereal, spent the week-end at the home of his mother, Mrs. G. Thompson.

Mrs. Ruley, also Mrs. Smith and daughter, of Kindersley, visited at the home of Mr. and Mrs. W. S. Lee this week.

Mr. P. Demeare left for Grannum Monday where he will remain for a few weeks looking after his farm interests there.

Miss B. Alspach and brother, N. Alspach, of Hanna, are visiting at the home of Mr. and Mrs. Jas. Ferguson, south of town.

Robert Harrington, of Big Stone, successfully passed his Grade X departmental examinations. Miss Audrey Neff was his teacher.

The Acadia Produce Co. are offering bib or pant overalls at \$1.00, white cups at 50c a dozen, fresh tomatoes at 30c a basket, best work socks 25c.

Miss Lillian Stewart, of Calgary, arrived here Sunday and will be with her father, Mr. J. D. Stewart, until after the harvest is over when they will return to their home at Calgary.

Miss Emes and Mr. Korek who formerly taught in the Chinook consolidated school, were guests at the home of Mr. and Mrs. E. E. Jacques on Monday and Tuesday, also calling on other friends.

Miss Catherine Ferguson, who has been attending summer school at Edmonton, returned Saturday. Miss Ferguson spent a week at Uncle Sam with her aunt and uncle, Mr. and Mrs. Glen Robertson.

Vincent Rideout entertained a number of his friends in honor of his guests, G. Lee Robertson, of Three Hills, and Harry Thorpe, of Calgary, Friday evening. The evening was spent in playing games after which a fine lunch was served.

A new novelty will be introduced shortly by Capt. C. O. Peters in regards to his Saturday evening dances. For the past few weeks a hamper of groceries has been given away free to the holder of the lucky ticket, now the Capt. has got a surprise for those attend these weekly dances. We cannot say more at the present time. Watch for his bills announcing an addition to the orchestra and the surprise he has to offer to the patrons of his weekly dances.

The daily vacation bible school held for the past two weeks in the basement of the school was a real success, over thirty pupils ranging in age from 3 to 13 years were enrolled. The program consisted of sacred and secular songs and stories, bible study, games and physical training, sewing, manual training and other hand work. The teachers in charge were Misses N. Hurley, B. Milligan, V. Kimble, Vincent Rideout and Mrs. Rideout. The school was conducted under the auspice of the United Church.

Alberta's Crop

The province of Alberta will reap a good crop this year. This is indeed fortunate for all. If only a decent price could be obtained immediate improvement would be noticeable.

Somebody recently remarked that the world was living on charity today. That is true. Bread eaters are getting their main food at less than the cost of production. That condition simply cannot go on for much longer.

Better grain prices would increase the price of flour and bread a trifle, but the result would be surprising. Wheat growers would have a little money to pay their debts, pay their taxes, buy articles they needed and a few luxuries, perhaps. Once this buying was started the circle would immediately spread. Times would soon return to normal.

And so we long for better grain prices to go along with our good crop. Eighty cents a bushel, a figure that was considered trivial a few years ago, would be quite acceptable now. A dollar a bushel would be wealth indeed. Binders are humming throughout the length and breadth of the province. Eighty million acres of wheat has to be cut, as well as several million acres of oats, barley and rye. Taking off the harvest in this province is a big job. It is indeed fortunate that Alberta has a good crop to harvest. —Hanna Herald.

A Fine Eulogy to the Cow

Of all the animal friends of man the cow is the greatest. To her we owe the most. I wish that I, as you are about to sit down to the noonday meal, might remove from your table what the cow has placed there. I'd take the cup of milk waiting at b-by's chair, I'd take the cream, the cheese, the butter, the custard pie, the cream biscuits, the steak, the smoking roast of beef, and leave you to make a meal of potatoes, beets, pickles and toothpicks.

There is not a thing from nose to tail but that is utilized for the use of man. We use her horns to comb our hair, her skin upon our feet, the plaster upon our walls, her hoofs make glue, her tail makes soap, she gives us milk, our cream, our cheese and butter, and her flesh is the greatest meat of the nation, her blood is used to make our sugar white, her bones are ground to fertilize our soil and even her paunch she herself has put through the first chemical process necessary for the production of the best white cardboard, and they have discovered that such paper can be made into the finest quality of false teeth.

No other animal works for man both night and day. By day she gathers food, and when we are asleep at night she brings it back to re-chew and convert it into all the things of which I speak.

She has gone with man from Plymouth Rock to the setting sun. It was her sons that turned the first sod in the settler's clearing; it was her sons that drew the prairie schooner for the sturdy pioneers as, inch by inch, they fought to prove that "westward the star of the empire takes its way," with the old cow grazing behind, and when the day's march was done she came and gave the milk to fill the mother's breast to feed the suckling babe that was perchance, to become ruler of the country. Who says that much of what we are we do

Signs British Canadian Pact

Prime Minister R. B. Bennett who with Rt. Hon. Neville Chamberlain, British chancellor of the exchequer, signed the Anglo-Canadian trade agreement at the conclusion of the Imperial Conference Saturday, Aug. 20.

Canadian Farmers May Hold Their Wheat

Winnipeg—Taking their cue from the American farmers of the northwest many producers in the Canadian provinces are declared to be making ready to hold their wheat this fall. They will not rush their grain to the market at existing prices, it is said at this centre.

So it is not thought hedging will be as much of a factor on this exchange as earlier in the season. Here it is said Canada's only competitor in world grain markets for the balance of the year is the United States. It is asserted by the Canadian trade that the United States carry over estimated at 362,000,000 bushels is at present held above export parity.

New crop of Western Canada has started to move and country marketings the last few days have exceeded 1,000,000 bushels. Hedging pressure is becoming a factor and is not offset by any increase in export business.

Greater part of the crop in Manitoba and Southern Saskatchewan is in the sheaf. Harvest is being rushed in all three provinces. The quality of the new wheat coming now in appears to be exceptionally good, so far quite up to the standard of Canadian wheat the last two years.

With the top grades No. 1 hard and No. 1 northern predominating, baking tests on the new crop are now being made and laboratory reports are awaited with keen interest by millers here and abroad.

A Conundrum

Wheat was invented by the Almighty as a conundrum for farmers the world over and it keeps the producer broke and sends the merchant crazy. It varies considerably on different farms and a man who grows it is called a fool by his friends, a hero by the public, and a poor business man by his creditors. The price is regulated by heaven knows whom; when the grower wants to sell the price has dropped; when he wants to buy, it is up; when he has sold, the price goes up and drops after he has bought. Whatever he does is wrong, so the best thing to do is to act at once and watch the market after.

not owe to man's best friend, the cow? Treat her kindly, gently, for without her, words fail to describe the situation.—Colonel F. W. Woods.

How Canadian Trade Will Benefit Under Terms of Pact With United Kingdom

Ottawa—The preferences which the United Kingdom will grant to Canada under the new treaty, and the present preferences are given below:

Product	New Pref.	Present Pref
Wheat	2s per 8 bushels	None
Butter	15s per cwt	10 per cent
Cheese	15 per cent ad valorem	10 per cent
Apples, raw	4s 6d per cwt.	10 per cent
Pears, raw	4s 6d per cwt.	10 per cent
Apples, canned	3s 6d per cwt.	10 or 25 p c
Dried Fruits	10s 6d per cwt	7s per cwt.
Eggs in shell	1s to 1s 9d per qt. 100	10 per cent
Condensed Milk	5s per cwt.	20 per cent
Copper, unwrought	2d per lb.	None
Timber	10 per cent	10 per cent
Fish, fresh sea	10 per cent	10 per cent
Salmon, canned	10 per cent	10 per cent
Asbestos	10 per cent	10 per cent
Zinc	10 per cent	10 per cent
Lead	10 per cent	10 per cent

In the case of condensed milk the sugar content is subject to regular sugar tariff.

Dies Following an Attack by Bull

Thrown to the ground and terribly gored and trampled by an enraged bull which she unsuccessfully tried to chase out of her garden on her husband's farm near Patricia, Mrs. H. O. Nunne-maker, aged 32 years, formerly of Calgary, died last Wednesday.

According to meagre details of the accident available, Mrs. Nunne-maker was in the kitchen of her farm home Wednesday morning when she suddenly noticed the bull tearing up her garden. Without realizing the danger, Mrs. Nunne-maker ran out and tried to chase the animal away.

It retreated several steps and with a bellow of rage suddenly turned and charged at the woman. Mrs. Nunne-maker attempted to flee but stumbled, and the animal inflicted terrible injuries before it was finally routed by farm hands who heard the woman's screams for help.

Mrs. Nunne-maker was well known in Calgary. She attended high school and Normal school there and for a time before her marriage she taught school in Bissano and in the Coltholme district. She is survived by her husband, three children, Owen, aged 5 years, Warren, aged 3, and Elm, aged one month; her father, three sisters, Mrs. Katherine T. Hall, of Picton, Ontario, Mrs. R. E. Smith Aylesworth,

Chinook United Church notice—Sunday, August 28, service at Rearville, 7:30 p.m., Rev. R. Rollis will preach, (overleaf residents please take note.

Two hundred organizations affiliated with the governing body of the Canadian Chamber of Commerce, whose seventh annual convention will be held at Halifax, September 13-15, will send members to a pre- and post-convention sea cruise and land tour with the Clarke Steamship Co., the Dominion Atlantic and the Canadian Pacific Railways, scheduled to leave Montreal September 3 and return there September 19. The sea cruise will be on the S.S. New Northland, calling at Charlottetown, Sydney, St. Pierre-Miquelon, St. John's, Newfoundland, and Halifax, prior to the convention, and will cover the Maritime Provinces after it.

Cost of travel to Eastern Quebec, the Lower St. Lawrence and to resorts in the Maritime Provinces has been deflated this summer in a fare revolution that has never been equaled in the history of the railroads of Canada. This reduction works out at about five and one-half for the round trip to any one of a score of glorious summer centres on Canada's unsurpassed Atlantic seaboard with proportionately reduced fares to many other destinations in eastern Quebec and the Maritime Provinces which are also in effect from stations in the province of Quebec, Montreal and west, and also in Ontario, Sudbury, Capreol, Windsor, Sarnia and east. This great concession by the railways of Canada is on offer during the month of August with a return limit of 21 days, including the date of sale. (562)

of Calgary, and Mrs. Leva B. Fowler, of Longueuil, Alberta. [Deceased prior to her marriage was Miss Leah Smith and sister of Mrs. Jess Fowler, and was well known in this district having taught school for some years at Coltholme some twelve years ago.]

The Chinook Advance

Published by Mrs. M. C. Nicholson every Thursday afternoon from The Advance Building, Main Street, Chinook, Alberta, and entered in the postoffice as second class mail matter.

All letters addressed to the editor for insertion in The Advance, must be signed to show bona fides of the writer. Publication in all cases is subject to the judgment of the publisher. We do not necessarily publish with views expressed.

The subscription rates to The Advance are \$1.50 per annum in Canada and \$2.00 outside of Canada. The transient advertising rates in The Advance are—display, 60c per inch for first week and 30c for each succeeding week, providing no change is made. For heavy composition an extra charge is made for first week. Reading notices, 10c per count line. Legal advertising, 15c per count line for first week and 10c for each succeeding week. Cards of thanks, \$1.00.

The Advance is a member of the Canadian Weekly Newspapers Association and the Alberta Weekly Newspapers Association, and observes the prices and conditions of these organizations.

Small Advertisements

Advertisements under this heading are charged at the rate of 50c for 25 words or less per week, with 10c for each additional 5 words. Three weeks for the price of two.
